L'ORÉAL GROUPE · TEAM D · M4 VIDEO

Record your part

12 weeks with Layla · about 70 seconds each · one take you are happy with

1 Set up

- Rear camera, **landscape**
- Phone at **eye height**, about 1 m away
- Sit in the **centre** of the frame
- Plain dark top, no logos

2 Light & sound

- **Face a window**, ceiling lights off
- Quiet room; laptop and fans **away** from the phone
- Wired or clip-on mic if you have one

3 Look

- Look a little to **your right**: a post-it 25 cm right of the lens
- Turn to the lens only on your LENS line

4 Read

- Open the **teleprompter** on a laptop or tablet, right of the lens
- Pick your name, press **Start**
- **Edit text** if a word does not fit you

ariel-silvio.github.io/pro-go/teleprompter.html

5 Record

- Send a **10-second test** to the group first
- Wait **3 seconds** before you speak and after you stop
- Aim for **65–75 s**; calm pace

6 Send

- Upload the **original file** to Descript › **Speakers**
- or a Google Drive link set to **Anyone with the link**
- Name it **M4_S2_Ariel_take1**

iPhone — CHANGE THESE

Settings › Camera

Formats	Most Compatible
Record Video	1080p at 30 fps · HDR Video off
Record Sound	Spatial Audio off (stereo)

Spatial audio is why Descript refused an iPhone file. HDR can look washed out.

Android — LOWER RISK

Camera › Settings (Samsung: Advanced recording options)

Video size	FHD 1080p, 30 fps
High efficiency video	off
HDR10+ video	off

No spatial-audio problem on Android. Most phones are fine on default settings.

NEVER send the video by WhatsApp or email: both shrink it. Stuck with a file? Share the Drive link with Ariel and we fix it.
